

ProMart365™ built on top of Microsoft Dynamics 365 Business Central, is a complete retail solution designed especially for supermarkets. It helps manage the whole operations efficiently – from head office to POS terminals.

### Key Features:

- Replicate data automatically between HO and POS terminals in all stores (items, prices, barcodes, discounts, store information, store number, name, address), POS Information (POS number, description, staff)
- Mix and match (example: Buy 1 get 1 free).
- Discount Offer (discount on division, item category, product group, item, special group of items)
- Total discount offer.
- Deal prices.
- Line discount offer by taking sum discount or the highest discount.
- Member Clubs Loyalty Card with different programs.
- Ability to link Member Club with multiple discount types.
- Contracts: - Consignment.  
- Investment.  
- Rebate.  
- Rent.

### Key Benefits:

- From the head office, you will have the ability to:
- Define all stores and POS terminals (store number, address, POS number, description)
- Define all tender types and link them to account chart (cash LBP, cash USD, Visa/Master Card)
- Define staff details in different stores.
- Manage different stores prices.
- Manage different discount types.
- Use standalone POS – without causing any connection interruptions.
